SUMMARY

Supply chain leader with 17 years in manufacturing and distribution, the last five running planning, purchasing and logistics for a $480 million packaging business. I build planning processes people actually follow, and I've cut inventory without hurting service at three companies. Looking for a senior supply chain role with a growing manufacturer.

EXPERIENCE

Tennwick Packaging Supply Minneapolis, MN
Director of Supply Chain Feb 2021 – Present

- Lead planning, purchasing, warehousing and transportation for four plants, with a team of 46 and $210 million in annual spend
- Cut inventory by $18 million in two years while raising order fill rate from 93% to 98%
- Set up a monthly sales and operations planning meeting that sales, finance and plant leaders run together, with one shared forecast
- Moved 60% of freight to two carriers under new contracts, saving $2.6 million a year
- Led supplier recovery through the 2021 and 2022 resin shortages, with no missed customer shipments and no air freight
- Opened a third-party warehouse in Dallas to serve southern customers, cutting delivery times from four days to two

Lakeport Components St. Paul, MN
Senior Supply Chain Manager Mar 2017 – Jan 2021

- Ran demand and supply planning for 4,000 parts sold to equipment makers
- Moved planning from spreadsheets to an advanced planning system; forecast accuracy rose from 61% to 78% in a year
- Built a supplier scorecard for the top 40 suppliers and cut late deliveries by half
- Managed a planning team of nine and promoted three planners into supervisor roles
- Worked with engineering to retire 700 slow-moving parts

Gorseholt Distribution Eagan, MN
Logistics Manager May 2014 – Feb 2017

- Managed inbound and outbound freight for two distribution centers shipping to 1,200 stores
- Introduced a transportation management system and cut freight cost per case by 11%
- Redesigned delivery routes for the northern region, removing two trucks from the fleet
- Handled carrier contracts and claims, recovering about $400,000 a year in damage claims
- Ran the weekly carrier review and replaced two carriers with on-time rates below 90%
- Set delivery windows with store operations that cut overtime in store receiving

Harmon & Pike Manufacturing Plymouth, MN
Supply Planning Analyst Jun 2011 – Apr 2014

- Planned materials for two assembly lines and kept stockouts below 1% of orders
- Built the weekly inventory report used by the plant manager and finance team
- Cleaned up lead times and order quantities in the ERP for about 2,500 parts
- Represented the planning team on the ERP upgrade project and wrote the test cases for material planning and purchasing screens
- Kept the plant's material shortage list and chased late parts with suppliers

- Set safety stock levels for the top 300 parts using actual demand variation
- Covered purchasing for two buyers during busy seasons and vacations

Ironhaw Freight Chicago, IL
Operations Coordinator Jul 2009 – May 2011

- Scheduled drivers and tracked about 150 loads a day for a regional carrier
- Answered customer questions about delays and coordinated with dispatch to fix them
- Built an on-time delivery report the operations manager now shares with customers
