SUMMARY

Data analyst with three years in e-commerce, working mostly in SQL, dbt and Looker. I like turning a messy question from marketing or operations into one clear chart and a recommendation.

EXPERIENCE

Trailhead Outdoor Supply

Denver, CO

Data Analyst

Apr 2023 – Present

- Built the Looker dashboard for weekly sales and returns that 40 managers use; it replaced six emailed spreadsheets
- Found through a cohort analysis that free-shipping customers returned 2x more often; the threshold change saved \$380K a year
- Moved 25 reporting queries into dbt models with tests, cutting broken-report tickets from about 10 a month to 2
- Designed the A/B test readout template the marketing team now uses for every email and site test

Foothill Credit Union

Boulder, CO

Junior Data Analyst

Jul 2021 – Mar 2023

- Wrote SQL and Excel reports on loan applications for the lending team and automated three of them in Python
- Cleaned five years of member data before a core system migration and documented every field mapping
- Answered ad hoc questions from branch managers, usually the same day

PROJECTS

Colorado Trail Usage | *Python, BigQuery, Streamlit*

2024

- Public dashboard of trailhead counts from state open data; featured in a local outdoor newsletter

EDUCATION

Front Range State University

Fort Collins, CO

Bachelor of Science in Statistics

May 2021
