SUMMARY

Mechanical engineer with five years of experience designing pumps and enclosures for industrial customers, from first CAD model through production. Licensed Engineer in Training.

EXPERIENCE

Ridgeline Fluid Systems

Columbus, OH

Mechanical Engineer

Mar 2022 – Present

- Redesigned the impeller housing on a 50 HP pump line in SolidWorks, cutting part count from 14 to 9 and unit cost by \$310
- Led root-cause analysis on seal failures at two customer sites; the fixture change I proposed ended the repeat returns
- Wrote test procedures for flow and vibration testing that the quality team adopted for all new pump models
- Review drawings and tolerance stacks with two suppliers before each production release

Cardinal Equipment Works

Dayton, OH

Associate Engineer

Jun 2020 – Feb 2022

- Designed sheet metal enclosures for control panels and released 120 drawings with GD&T to the shop floor
- Ran FEA on lifting brackets in ANSYS and reduced wall thickness by 20% while keeping a 3:1 safety factor
- Supported installation of a new press brake line and trained six operators on the setup sheets I wrote

Miami Valley Tooling

Dayton, OH

Engineering Co-op

Jan 2019 – Aug 2019

- Designed and machined a drill fixture that cut setup time on a high-volume bracket from 25 minutes to 8

EDUCATION

Buckeye Valley University

Columbus, OH

Bachelor of Science in Mechanical Engineering

May 2020

- Senior design: low-cost irrigation pump, first place among 22 capstone teams

SKILLS

Design: SolidWorks, AutoCAD, GD&T, tolerance analysis, design for manufacturing

Analysis: ANSYS, MATLAB, root-cause analysis, test planning

Manufacturing: Sheet metal, CNC machining, injection molding

Licenses: Engineer in Training (EIT), Ohio
